"MANAGEMENT PLAN": A STRATEGIC TOOL FOR THE PRESERVATION AND VALORI- SATION OF UNESCO SITES

Management plans for World Heritage sites have to face new challenges since the World Heritage Convention was adopted in 1972. The basis of all the actions is the preservation of their Outstanding Universal Value, their authenticity and integrity as established in the moment of their inscription. However new and extreme changes (social, political, climatic, etc), which cultural heritage faces today, lead us towards new conservation and management strategies whose objective should be to manage these changes while maintaining essential values.
