

# NANO TECHNOLOGY

## Opportunity or Threat?

### Open Science Debate

Politecnico di Milano, room 3.1.3

23 March 2023 17:30-19:30

Carl Sagan stated over 30 years ago that “We live in a society exquisitely dependent on science and technology, in which hardly anyone knows anything about science and technology.”

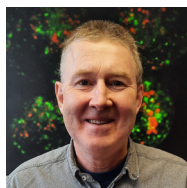

How does this statement sit within the remit of nanotechnology and nanoparticles today? This interactive presentation and debate will assess our current ‘dependency’ on nanotechnology and its products and also highlight some of the ongoing work in this research space within the MUSIQ Consortium and efforts to generate smart disease targeting nanotherapeutics.

# Programme

## Presentation

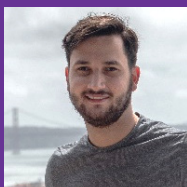

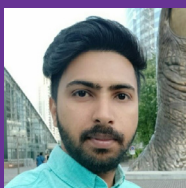

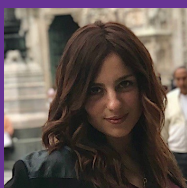

**Nanotechnology and Nanoparticles : from environmental harm to future therapies**  
Arwyn Tomos Jones  
Cardiff University

## Open science debate

**Moderator**  
Prof. Paola Borri  
MUSIQ project coordinator  
Cardiff University

### Open science debate panelists: MUSIQ Early Stage Researchers

## Organisers

An outreach event organised by the EU-funded MUSIQ project

**MULTIPHOTON MICROSCOPY AND ULTRAFAST SPECTROSCOPY:  
IMAGING MEETS QUANTUM**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 812992.
